

AtriumHouses

The Iris greenhouse.

This stylish octagonal model from AtriumHouses comes in 4 models and brings a touch of modern elegance to your garden, as well as horticultural practicality. Made from the same warm hued western red cedar as the rest of the Iris Cedar range, with the same rot resistant properties, this spacious high eaves model provides the perfect growing environment.

With its 2 high-level side louvre vents and 2 automatic roof vents, it provides excellent ventilation, drawing fresh cool air from below, and pushing out stale warm air above.

The Iris is an extremely strong, high quality cedar greenhouse, designed to be maintenance free- even with the standard cedar bar capping. The models all have the same strong cedar frame, lockable hinged doors with low-level threshold, and toughened safety glass

The Growmore Cedar The Iris

For almost 2 decades, our specialists have designed and built Victorian greenhouses for beautiful gardens on the continent of Europe. For our clients who want a beautiful, aesthetic, strong and functional, maintenance free alu greenhouse with qualities of an original heritage structure, this is an important alternative to notoriously overheated and low quality, plain looking greenhouse.

The Iris models comes in 4 standard sizes, with Cedar dwarf walls.

Sizes are:

1989 x 1989

2800 x 1989

2800 x 2800

2800 x 3611

To grow plants it's notoriously known to all greenhouse enthusiasts that effective ventilation, temperature control and controlled watering gives exactly the right and buoyant atmosphere that all growers aim for – the Growmore Cedar greenhouse is made to meet these demands and will be your greenhouse for life.
